

Professional Summary

Frontend Software Engineer with 1.5+ years of experience building scalable React.js applications used by 5,000+ daily active retailers. Experienced in JavaScript (ES6+), TypeScript, React, Redux Toolkit, REST APIs, performance optimization, and reusable component architecture. Strong focus on building responsive, maintainable, and high-performance web applications in Agile environments.

Technical Skills & Attributes

Core Web: JavaScript (ES6+), ReactJS (Core Principles, Hooks), TypeScript, HTML5, CSS3
Architecture: UI/UX Design Translation, Scalable Component Architecture, Responsive Web Design
State & Tools: Redux Toolkit, Zustand, Flux workflows, Webpack, NPM, Git, Tailwind CSS
API & Security: RESTful APIs, Web Services, JSON, JWT Authentication, OAuth awareness
DevOps & QA: Agile/Scrum, Jenkins, Jira, Unit Testing concepts (Karma/Jasmine awareness)
Backend: Node.js, Express.js, MongoDB (Full-stack awareness for end-to-end integration)

Professional Experience

- Sep 2024–Present **Frontend Engineer, Bijnis, New Delhi, India**
- **UI Architecture:** Led design and development of core B2B e-commerce workflows (product discovery, filtering, multi-step checkout) serving 5,000+ active retailers.
 - **Reusable Components:** Architected a scalable front-end library of 20+ responsive UI components, accelerating cross-team feature delivery by 30%.
 - **Performance Optimization:** Improved rendering performance by ~40% utilizing route-level code splitting, lazy loading, and React memoization strategies.
 - **State Management & Lifecycle:** Integrated Redux Toolkit across 8+ modules to resolve complex data architecture issues, and maintained software through full product lifecycles in Agile sprints.
- Mar 2024–Sep 2024 **Software Engineer, Mobiloitte Technologies, New Delhi, India**
- **Design Translation:** Translated complex Figma wireframes into high-quality, responsive React.js and Next.js interfaces using a strict component-driven approach.
 - **Full-Stack Integration:** Built secure modules interfacing with REST APIs and Web Services, managing asynchronous data states and JSON payloads seamlessly.
 - **Quality & DevOps:** Resolved production issues during peer reviews to minimize QA defects, and utilized Git/Jenkins for versioning and deployment with backend teams.
- Jun 2023–Aug 2023 **Frontend Developer (Intern), Bijnis, New Delhi, India**
- Assisted senior engineers in building React components for live production SaaS applications, focusing on DOM manipulation, OOP concepts, and responsive design.

Relevant Projects

- 2024 **Expense Tracker Application, React Native, TypeScript**
- Built a cross-platform (iOS/Android) application featuring JWT authentication, multi-wallet management, reusable UI components, and optimized application rendering flows.
- 2024 **Secure Bank Transaction System, Node.js, Express.js, MongoDB**
- Engineered scalable backend APIs to support account management and transaction processing, demonstrating a deep understanding of full-stack data flow and REST API design.

Education

- 2022–2024 **Master of Computer Applications (MCA), IIMT University, Meerut, India**
2019–2022 **Bachelor of Computer Applications (BCA), CCS University, Meerut, India**
